Group 28

Problem Space

"Team collaboration taking place in a **UQ classroom** with the possibilities **of social** and/or **contextual computing"**

What does that mean?

Managing redundancies between face-to-face and online work

Enhancing collaboration environment and tools

"UQ students who are: Enrolled in courses with **In-class Team Assessments"**

Domain Experts

Supporting Evidence

"Students collaborate more effectively when they have information about their teammates' knowledge, activities or progress" (Schnaubert, 2022)

"Educators and institutions are not fully leveraging the potential of mobile technology in classrooms" (Crompton 2018)

"An effective space requires people willing to both talk and listen, driven by group energy and comfort" (Interview)

Audience

Group 28

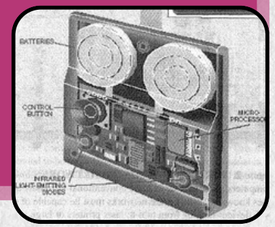

Skills	• **Varied confidence** using digital collaboration tools • Able to **communicate**, **divide** tasks and **contribute** different skills
Values	• Fair contribution and accountability • Feeling included, heard and respected
Workflows	• **Move between** face to face discussion and digital tools • Continuing collaboration outside of classroom
Priorities	• Wants to **maintain awareness** of teammates **contributions** • **Reduce** confusion, duplicated work and unequal workload

Design Opportunity

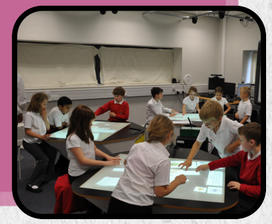

Collaboration in technology infused classrooms

Computing for the 21st Century (Mark Weiser) - Badges, Pads and Boards

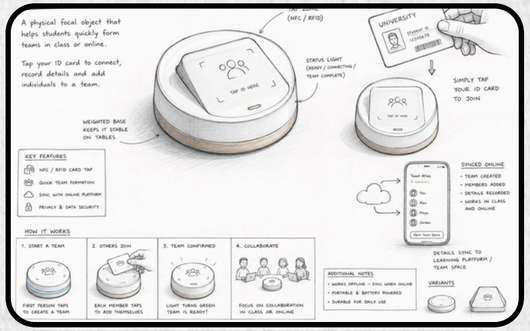

Multitouch tables for collaboration (Higgins, 2011)

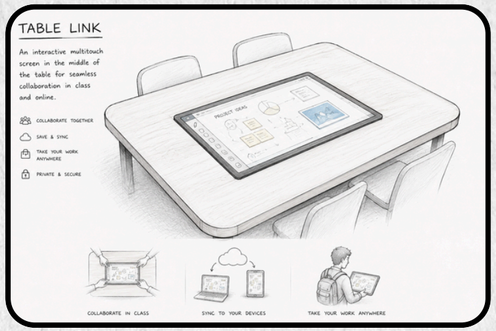

Concepts

Solution 1 - Tap In

Physical focal object for students to **facilitate quick group setup** between members.
Connect via ID card which will record details and add individuals to a team

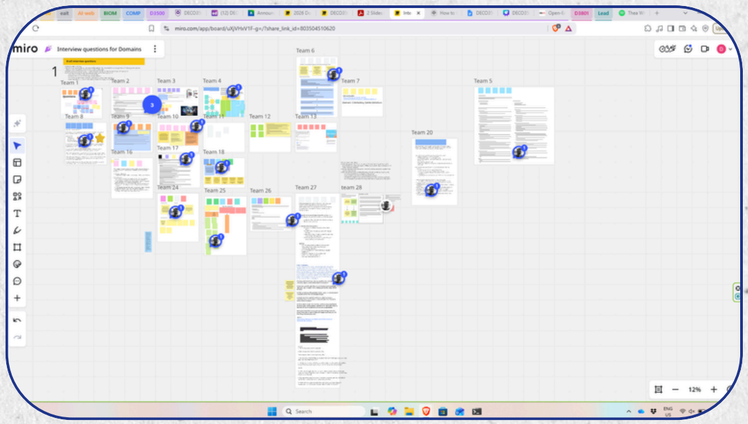

Solution 2 - Zook it

Interactive table feature meant to replicate butchers paper and miro boards, and acts as a means to **bring class work online**

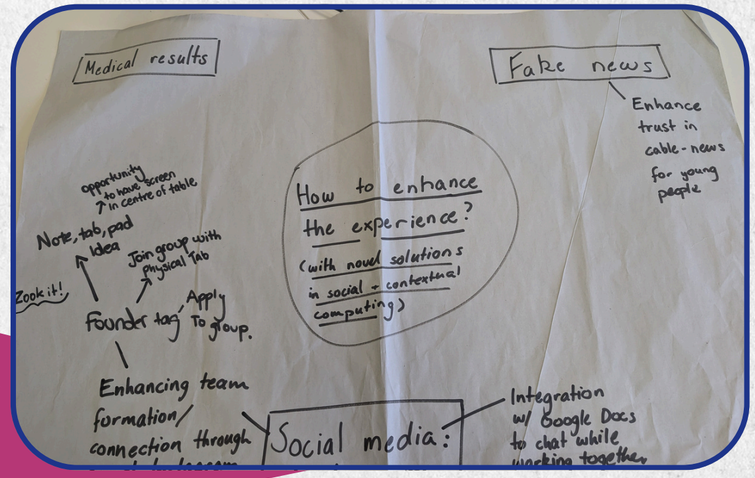

Existing Solutions

Group 28

← Miro Board

Butcher's Paper

Padlet **EchoPoll**
Miro **RiPPLE**

Shared whiteboards
Butchers paper

GoogleDoc
Canva
Jira

Where these fall short:

Physical and digital collaboration remain **separated**

* Each participant is bound to their **own screen**, even when working together face to face

* Setup and switching tools create extra coordination work

No single workspace transitions smoothly from class to home

Group 28

Plan of Work

1. **Validate** the core concepts
2. **Investigate** student needs
3. **Explore** classroom workflow
4. **Prototype** experience
5. **Test** with students
6. **Refine** our design

Methods

Semi structured interviews
Classroom observations
Existing solution analysis
Low fidelity prototyping
Usability testing
Thematic analysis
